

Create And Configure IBM Cloud Services

TEAM ID: PNT2022TMID30551

PROJECT NAME : IOT - BASED SMART CROP
PROTECTION SYSTEM FOR AGRICULTURE

Create A Database in Cloudant DB

The screenshot displays the IBM Cloud Catalog interface for the Cloudant service. The browser address bar shows the URL: `cloud.ibm.com/catalog/services/cloudant?bss_account=975f02b608e04062b42b1d93946ce122`. The page header includes the IBM Cloud logo, a search bar, and navigation links for Catalog, Manage, and the user account (karpagam K's Account). A blue banner at the top promotes a 600 USD credit offer with code CLOUDANTFREE600.

The main content area is titled "Cloudant" and describes it as a scalable JSON document database. It features a "Create" button and an "About" tab. Below this, the "Select an offering" section shows the "Cloudant" offering with a description: "IBM Cloudant is a fully managed JSON document database that offers independent serverless scaling of throughput capacity and storage." and a note that the "Lite plan" is available.

The "Select an environment" section at the bottom shows options for "Multitenant" and "Dedicated". On the right side, a "Summary" panel lists the "Cloudant Lite" plan as "Free" with specifications: 20 Reads/sec, 10 Writes/sec, 5 Global Queries/sec, and 1 GB Storage. Below the summary, there is a "Create" button and an "Add to estimate" button.

The Windows taskbar at the bottom shows the system clock as 14:16 on 19-11-2022, with a temperature of 28°C and a "Haze" weather condition.
