by the Design Team of Accenture Interactive NL

Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users. ${\mathscr P}$

Protecting of crops from wild animals

PH sensor for monitoring plant growth DHT11 for temperature and humidity

Protect the crops from all issues and make the high yield using automation

Proper storage facility to store crops

Detailed actions your user has to

level is indicated for humidity is

crops from

meter should be included for watering

fertilizers are crop growth

Automatic to be used for
